

RediRoot Plastic Aeration Containers

Plastic Pots That Defy Circling Roots

REDIROOT.

Smooth wall pots produce circling roots and swampy soil. **RediRoot Plastic Aeration Containers** eliminate root circling, help roots to breathe, leading to thriving plants, reduced turn times, and satisfied customers.

RediRoot: "Healthy Roots, Happy Plants"

Why Choose RediRoot Containers?

- Superior Root Health and Development (air pruning)
- Reduced Transplant Shock and Higher Survival Rates
- Improved Aeration, Drainage and Disease Prevention
- Increased Efficiency, Profitability and Long-Term Savings (quicker times to turn, less frequent up-potting, reduced fertilizer runoff)
- Durable pots, will last for years in your nursery
